

Deep Duggal

Front End Web Developer

5320 Spring Pines Way
Raleigh, NC 27616
6624-WEB-APP
deep@deepduggal.me

EXPERIENCE

Trade Ship Inc, Long Island, NY — Intern

May 2016 - November 2016

I created websites and hybrid mobile applications (Android, iOS, and Windows) using Oracle's Application Development and Mobile Development Framework.

Learn Bhangra App, Remote — Intern

May 2016 - November 2016

I was at Learn Bhangra App when it was first founded. I worked on creating some of the Android app's core functionality and contributed to the front end design of the website.

EDUCATION

Udacity & Self-Taught — Web Development

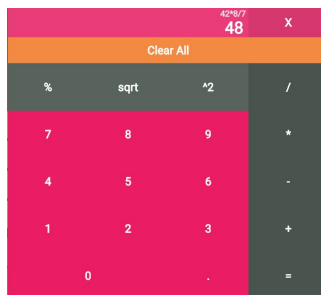

August 2016 - May 2016

I learned most of my Front End Development skills via Udacity's online courses. I solidified and modernized my knowledge by working on my own projects.

PROJECTS

Sexy Calc — Completed

I noticed that a lot of people used "online calculators" (shout out to Google Adwords' Keyword Selector Tool). I also noticed all of the online calculators available on the web were ugly and not mobile-friendly. So I made one that is.

www.DeepDuggal.me — Completed

This is my personal website that I use to showcase my latest programming projects and interesting things in general.

FRONT END SKILLS

HTML, CSS, JS

HAML, SASS/SCSS, CoffeeScript

Python, Java, Android

FRONT END TECH

Twitter Bootstrap

Zurb Foundation

jQuery

Oracle ADF and MAF

Git and Github

CURRENTLY LEARNING

React.js, Angular.js

Node.js

NPM, Bower

Grunt, Gulp
