Deep Duggal

Front End Web Developer

5320 Spring Pines Way
Raleigh, NC 27616
6624-WEB-APP
deep@deepduggal.me

EXPERIENCE

Trade Ship Inc, Long Island, NY — *Intern*

May 2016 - November 2016

I created websites and hybrid mobile enterprise applications (Android, iOS, and Windows) using Oracle's Application Development and Mobile Development Framework.

Learn Bhangra App, Remote — *Intern*

May 2016 - November 2016

I was at Learn Bhangra App when it was first founded. I worked on creating some of the Android app's core functionality and contributed to the front end design of the website.

EDUCATION

Udacity & Self-Taught — *Web Development*

August 2016 - May 2016

Steve Huffman, CEO of Reddit, and Marcus Phillips, Co-Founder of Hack Reactor taught me web development at Udacity. I solidified my knowledge by working on my own projects.
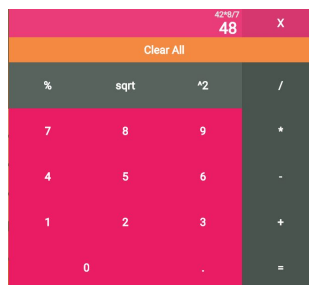

PROJECTS

Sexy Calc — *Completed*

A lot of people use online calculators, but the available ones are ugly and not mobile-friendly. So I made one that is.

deepduggal.me — *Completed*

This is my personal website that I use to showcase my latest programming projects and interesting things in general.

SKILLS

HTML, CSS, JS
